

Crazy

Estelle

you cant just kiss my feet and just make my life complete
then just turn and walk away so easily
you cant just make me come like whoa, ask me to pick up the phone
when the way you try to slip on me, not me
now im back and im knockin at your door
answer the phone i know you are at home, at home,
i know youre at home, oh baby

you wanna leave me now after all that we've been through,
headlights busted, straight through your window,
you, you make me crazy
but it didnt turned out the way that i planned it,
you were just playin but i love you
you shouldda known you that make me crazy

i wont let you blow my mind then just thank me for my time,
my head is spinnin like you wont believe, believe me
you cant break up with a call like you never made of it all
cause if im goin down, boy you're comin with me, oh
start your car, coz you gotta come around (not sure about this)
freshen up or later youll get me down
me down me down

you wanna leave me now after all that we've been through,
headlights busted, straight through your window,
you, you make me crazy (you drive me out of my mind)
but it didnt turned out the way that i planned it,
you were just playin but i love you
you shouldda known, you that make me crazy

see i thought i thought and i thought again,
you aint my lover and you werent my friend, see that didnt make sense to me
only thing i can do is grieve, if angels goin out tonight
i aint leavin you without a fight,
coz it feels like you messin with my life and these
words cant make it right

so you wasted my time made me drive from the line,
you can give me a high now that wasnt me blind
i tried and tried
you stole my pride
i'll make you regret for the rest of your life,
yes i will, yes i will, yes i will
coz you drive me crazy

you make me wanna scream, you make me wanna shout
you make me wanna hoo-ohh-ohh, you make me wanna holler,

you make me wanna scream, you make me wanna shout
you make me wanna ho-ho-holler
