

# You and I

Estelle

Every little  
Every little

The first time I met you  
You were so quiet and cool you  
Never thought that you would kiss my heart the way you did  
All of the sadness in passing  
Making me feel like I'm past it  
But you reel me in in the sweetest way

Oh I'm so enamored by you  
All in my music all you  
Do you keep me surfing on the hope that we can be together, are you?  
I hope you listen to this  
I hope you get to feel this  
Because everything is you  
Come on

Come close to me  
Only your love can do me  
Every little thing I do you are  
Baby you know your special  
I don't care what the rest do  
Every little thing I do you are

If love had a face then it's you  
Made for me how did you know  
The best type of love who must have led you to hurt me  
If there's anything I can do  
Let me know I'll be a fool  
But don't take advantage cause I will hate to have to leave you  
Your touch makes me feel like a woman  
Takes me beyond feeling human  
When you touch me oh the smell of you  
When we're alone it's beautiful  
Makes me not want to leave you no  
Everything is you

Come close to me  
Only your love can do me  
Every little thing I do you are  
Baby you know your special  
I don't care what the rest do  
Every little thing I do you are

Come close to me  
Only your love can do me  
Every little thing I do you are  
Baby you know your special  
I don't care what the rest do  
Every little thing I do you are

Ooh when your lying next to me

I can't believe your next to me

It's only us in this moment

No interruptions we focus

Tell you I'm glad I risked it

God knows that I would have missed it

You're so amazing baby everything you do  
Come close to me

Only your love

Everything little thing I do you are

Baby you know your special

I don't care about the rest

Everything little thing I do you are

Baby

Baby you are

Baby

You are

Baby you are

Baby
