

Only With You

Ester Dean

never knew it would feel this good to me, baby
i feel like i'm above the clouds
and while my heart just won't let me come down
looks like a perfect picture, painted from my eyes
and i only long for you

i'll never take you for granted
boy i'll always be here
of all the people on this planet
only you can take me there

only when i'm with you
my life just gets better
only with you
my love is forever
only when i'm with you
this moment i'll treasure
only when i'm with you
with you, with you
only with you

we have the perfect chemistry
don't we baby?
it's like we're on a permanent getaway
and there ain't no one around
you are like, the perfect melody that's in my mind
and my heart belongs to you

i'll never take you for granted
i'll never, no, oh, oh
i'll always be here
of all the people on this planet
only you can take me there

only when i'm with you
my life just gets better
only with you
my love is forever
only when i'm with you
this moment i'll treasure
only when i'm with you
with you, with you
only with you

it's hard to find the words to say
cause boy you mean that much to me
i'm a flower you're the sun and rain
you're the candle, i'm the flame
you light me bright at the end of day
i will never be the same again

only when i'm with you
my life just gets better
only with you
my love is forever
only when i'm with you
this moment i'll treasure

only when i'm with you
with you, with you
only with you

only when i'm with you
my life just gets better
only with you
my love is forever
only when i'm with you
this moment i'll treasure
only when i'm with you
with you, with you
only with you
