

Balmes

Esthero

I think I need a change of scenery, warm water
Sunshine on my foot, just like my daydream
And on the nightly, everything is hot and sticky
But it's ok, cause no one plans to sleep here anyway

Because we all want a better life, I think I found it in this place

Everything is so sublime, you should come with me
We all want a better life, I think I found you just in time
And I'm feeling so divine, we all want a better life

And I'm not going home, I'm not ever going home

I think I need a change of scenery, yeah
I think I need you to be here with me

We all want a better life, I think I found it in this place
Everything is so sublime, you should come with me
We all want a better life, I think I found you just in time
And I'm feeling so divine, we all want a better life

Come...oh...come...better life...
