Save Our Love

Save our love Save our love Save our love Do you remember All of the joy we found last spring Oh baby So good together We never worried about a thing No no But now I see such a distance in your eyes And the seasons come between us I can't find my paradise Without your love I'm a little child lost in the world Mmm, come on baby Say it's not too late I know there's time enough Help me darling We got to save our love Save our love Stay close beside me 'Cause the sky is stormy now Come on baby, come on and save our love Walking in circles Thinking if all we had was gone Oh yeah My life would be worthless Never known emotions could run this strong Oh, you don't know What went on inside of me When you said that you'd be leaving 'Cause I hurt you selfishly Without your love I'm as hopeless As the earth without the sun Oh come on baby Say it's not too late I know there's time enough Help me darling We got to save our love Save our love Stay close beside me 'Cause the sky is stormy now Come on baby, come on and save our love Save our love Save our love Save our love Save our love

Eternal

So let's not fall apart Like all those other lovers I know if we trust Love will leave it up to us Oh

Oh, say it's not too late I know there's time enough Help me darling We got to save our love Save our love Stay close beside me 'Cause the sky is stormy now Come on baby, come on and save our love Save our love

Say it's not too late I know there's time enough Help me darling We got to save our love Save our love Stay close beside me 'Cause the sky is stormy now Come on baby, come on and save our love Save our love

Stay (stay) Stay
