

Something To Remember You By

Etta Jones

All give me something to remember you by
When you are far away from me

Some little something meaning love cannot die
No matter where you chance to be
I will pray for you night and day for you
It will see me through

Just like a charm 'til you're returning home
Give me something to remember you by
When you are far away from me

Give me something to remember you by
When you are far away from me
