

Wolves

Europe

Wolves at your door
Long dark shadows they throw
Wolves at your door
They will kill for what you know

And I can't trust nobody or maybe no one can trust me
It gets worse when you know things
And the fear runs deep

Wolves at your door
Making monsters of them all
Wolves at your door
Seeing monsters in us all

And I can't face nobody or maybe no one can face me
So damn hard when you've seen things
And the truth won't set you free

Wolves at your door
Wolves at your door
