

# Wolves

Europe

Wolves at your door  
Long dark shadows they throw  
Wolves at your door  
They will kill for what you know

And I can't trust nobody or maybe no one can trust me  
It gets worse when you know things  
And the fear runs deep

Wolves at your door  
Making monsters of them all  
Wolves at your door  
Seeing monsters in us all

And I can't face nobody or maybe no one can face me  
So damn hard when you've seen things  
And the truth won't set you free

Wolves at your door  
Wolves at your door
