## Wolves

Wolves at your door Long dark shadows they throw Wolves at your door They will kill for what you know

And I can't trust nobody or maybe no one can trust me It gets worse when you know things And the fear runs deep

Wolves at your door Making monsters of them all Wolves at your door Seeing monsters in us all

And I can't face nobody or maybe no one can face me So damn hard when you've seen things And the truth won't set you free

Wolves at your door Wolves at your door Europe
