

# Chemistry

Eva Simons

So long I've been waiting for someone that can satisfy my craving

You make me feel like, it's all amazing

The type of guy that's got my eyes gazing

Turn it up, turn it up

Baby give me some more

Yeah I want it, yeah, yeah I want it, want it

Turn it up, turn it up

Baby give me some more

Yeah I want it, yeah, yeah I want it, want it

Nothing in the air but the chemistry

You and me, you and me,

Nothing in the air but the chemistry

You and me got the chemistry

Oh no, let's not waste this

He coming from the fire that is blazing

We shouldn't be shy, the situation

Needs a doctor's phone cause I'm his patient

Turn it up, turn it up

Baby give me some more

Yeah I want it, yeah, yeah I want it, want it

Turn it up, turn it up

Baby give me some more

Yeah I want it, yeah, yeah I want it, want it

Nothing in the air but the chemistry

You and me, you and me,

Nothing in the air but the chemistry

You and me got the chemistry

You and me got the chemistry

I cant wait to do this bring it to me bring it to me

Make me dance all night

You cant wait to do this bring it to me bring it to me

Nothing in the air but the chemistry

You and me, you and me,

Nothing in the air but the chemistry

You and me got the chemistry

You and me got the chemistry
