Outerspace

Evan and Jaron

It's lonely here in outerspace The nearest stars are miles away But I believe I'm on to something big

I've only come to not be found To circle high above the ground And watch everyone else for a change

Don't you ever wish you'd never Don't you wonder if your face might shine Without the pies of lies

To all the girls who wish to be Immortalized in fantasy I wrote this song for you and not for me

I'm the senator of a lonely state Too far gone I've sealed my fate I'm so tired of being blown out with the cause

Don't you ever wish you'd met her Don't you wonder if your face might shine Without the pies of lies

I've arrived I'm doing well Quite a view from the top Though it is cold as hell I've arrived And it's hard to tell The bright lights from the starlights And the canyons from the hills
