

# Your Star

Evanesence

1. I can't see your star  
I can't see your star  
Though we're patiently waiting bedside for the death of today  
I can't see your star  
The mechanical lights of Lisbon frightened it away

R: And I'm alone now  
Me and all I stood far  
We're wondering now  
All in parts and pieces swim lonely for your own way out

2. I can't see your star  
I can't see your star  
How can the darkness feel so wrong

R: And I'm alone now...

So far away  
It's growing colder  
Without your love  
Why can't you see me calling your name  
Can't break the silence it's breaking me

All my fears turn to rage

R: And I'm alone now...

Hey  
Nothing worth fighting for  
We're wondering now  
All in parts and pieces swim lonely for your own way out
