

## Follow The Sun

Evermore

Come in close to the fire now  
I want to see you a little brighter now  
So take my hand as we turn to the wind and don't let go

We walk a world that's turning love  
The destination is the journey love  
So take my hand as we turn to the wind and don't let go

Let's follow the sun until the shadows fade  
Cross the desert till we find our place  
Think of where you're going not where you've come from  
Just lift your eyes and follow the sun

I saw you in a dream last night  
Amongst a crowd of black and white  
And as you smiled colors burst into life and shadows go

I couldn't turn this heart to stone  
And banish all of my feelings I've shown  
Through thick and thin, rain and wind  
Darling you won't be alone

Let's follow the sun until the shadows fade  
Cross the desert till we find our place  
Think of where you're going not where you've come from  
Just lift your eyes and follow the sun
