## **One More Song**

## **Every Avenue**

Take your friends and move them out We are the chase-ups of the night Losers-bite it But we don't go down without a fight

Ugly trends and pick-up lines Have shattered it's own pride Hopes and dreams and memories Have stopped to say good-byes

One more song we can sing along to Our big break No more mistakes One more time, we'll do what we have to To get this off the ground

One more song we can sing along to Our big break No more mistakes One more time, we'll do what we have to To get this off the ground

No more should've-been, no more could've-been There's no last thing now

Carve into the drawing board, just to wash it clean They big talk but they will never say what they mean

Crowded floors and sleepless nights, Photographs and stupid fights Hopes and dreams and memories You can't take away from me

Oh, oh oh oh, yeah

One more song we can sing along to Our big break No more mistakes One more time, we'll do what we have to To get this off the ground

One more song we can sing along to Our big break No more mistakes One more time, we'll do what we have to To get this off the ground

No more should've-been, no more could've-been There's no last week No more should've-been, no more could've-been There's no last thing now

Whoa, yeah Whoa, yeah

We only get one chance at this In this life it's hit or miss My hopes and dreams and memories You can't take away from me

One more song we can sing along to Our big break No more mistakes One more time, we'll do what we have to To get this off the ground

One more song we can sing along to Our big break No more mistakes One more time, we'll do what we have to To get this off the ground

No more should've-been, no more could've-been There's no last week now
