

My Baby Don't Love Me

Everything But the Girl

Great mistakes are made
When love gets lonely far from home
Beds are empty, nights are long
And you miss him bad when you're on your own

That's how I let my fate begin
Threw back the sheets, let someone in
And thought that love would understand
But nothing ever goes as planned

And now my baby don't love me any more
And I'm all done talking
My baby just walked up to the door
And kept right on walking

Now I would walk the earth and back again
Just to change his mind
But I'm so compromised
I cannot say he's being unkind

Take me back to fields and woods
Where we first met and love was good
It's that that really breaks his heart
A memory of how you start

And now my baby don't love me any more
And I'm all done hoping
My baby just walked out of the door
And the door's still open

My baby, talking about
My baby don't love me
My baby

Love has made mistakes before
It picks itself up off the floor
For most of us that's how you live
But my love never could forgive

And now my baby don't love me any more
And I'm all done talking
My baby just walked up to the door
And kept right on walking

My baby don't love me
Talking about my sweet baby
My baby don't love me any more
My baby, talking about
My baby don't love me
My baby, my sweet baby
My baby
