

Never Let You Down

Evil Conduct

I have known you all my life or so it seems
Stick together side by side, no one would ever interfere
Forever friends, for better and for worse
If you need me, count on me coz I will be there

I will never let you down
I will always stick around

We share the present, share the future, share the past
What we have is oh so special, yes forever it will last
The fights we fought, all the beers that we knocked back
You're my best mate, together we're a pack

I don't get it, won't you tell me what went wrong
You're trying to avoid me, I haven't seen you for so long
It's just a lie, you disappeared without a trace
Is that what you call friendship, is it just an empty phrase?
