

# One Way Mirror

## Example

Take me to a better place  
Take me to a better place  
On the otherside  
On the otherside of life

Take me to a better place  
Take me to a better place  
On the otherside  
On the otherside of life

And I tried, tried, tried  
To meet you perception  
And though it sounds good on reflection  
Didn't promise to embody perfection

And I tried, tried, tried  
To meet you perception  
And though it sounds good on reflection  
Didn't promise to embody perfection

One way mirror  
Three wishes I refuse to deliver  
You see the things I promise to give you  
Abusing my liver  
Get closer  
The closer you expect it gets clearer

I can see you but you don't see me  
I really need you but you don't need me  
You see though it all, you see through the one way mirror  
You see the things I promise to give you

You see the things I promise to give you  
Three wishes I refuse to deliver

Take me to a better place  
Take me to a better place  
On the otherside  
On the otherside of life

And I tried, tried, tried  
To be the addiction  
But that's the only place I go catch from  
You were frosted to me like I was vixen

One way mirror  
Three wishes I refuse to deliver  
You see the things I promise to give you  
The muse and my liver  
Get closer  
The closer you expect it gets clearer

I can see you but you don't see me  
I really need you but you don't need me  
You see though it all, you see through the one way mirror  
You see the things I promise to give you

You see the things I promise to give you  
Three wishes I refuse to deliver  
You see the things I promise to give you  
Three wishes I refuse to deliver
