

# Parasite

## Exodus

A distant hum  
Cuts right through the skies  
Calling my attention I look up  
I can't believe my eyes  
Thousands and thousands  
Hungry for our minds  
They're biting, eating and controlling  
Anything they find

Coming down from behind  
They've got no care for our kind  
See the world bending down  
On it's knees

Run-but you can't hide  
Blood-coming from inside  
My mind-doesn't know wrong from right  
Parasite!

A million more  
Coming after me  
They thrive on insecticide  
They live on DDT  
No poison can defeat  
The never ending swarm  
They'll eat you from insdie out  
You'll wish you were never born

Coming down from behind  
They've got no care for our kind  
See the world bending down  
On it's knees

Run-but you can't hide  
Blood-sucked from inside  
My mind-doesn't know wrong from right  
Parasite!

Now they're living in my brain  
I'm destroying at their cue  
A violent reaction starts within  
And now I'm after you!  
I'll grab you by your head  
and split your skull open wide  
The infestation in complete  
You're dead but yet alive!

Coming down from behind  
They've got no care for our kind  
See the world bending down  
On it's knees

Run-but you can't hide  
Blood-coming from inside  
My mind-doesn't know wrong from right  
Parasite!
