## **Parasite**

## **Exodus**

A distant hum
Cuts right through the skies
Calling my attention I look up
I can't believe my eyes
Thousands and thousands
Hungry for our minds
They're biting, eating and controlling
Anything they find

Coming down from behind
They've got no care for our kind
See the world bending down
On it's knees

Run-but you can't hide Blood-coming from inside My mind-doesn't know wrong from right Parasite!

A million more
Coming after me
They thrive on insecticide
They live on DDT
No poison can defeat
The never ending swarm
They'll eat you from insdie out
You'll wish you were never born

Coming down from behind
They've got no care for our kind
See the world bending down
On it's knees

Run-but you can't hide Blood-sucked from inside My mind-doesn't know wrong from right Parasite!

Now they're living in my brain I'm destroying at their cue A violent reaction starts within And now I'm after you!
I'll grab you by your head and split your skull open wide The infestation in complete You're dead but yet alive!

Coming down from behind
They've got no care for our kind
See the world bending down
On it's knees

Run-but you can't hide
Blood-coming from inside
My mind-doesn't know wrong from right
Parasite!
