

## Let's Start a War

Exploited

Let's start a war said Maggie one day  
With the unemployed masses we'll just do away  
They won't suss us, they'll never know

Let's start a war said Maggie one day  
Let's start a war said Maggie one day  
Let's start a war said Maggie one day  
You fight for your country  
You die for their gain

Death and destruction all around  
Shops and houses are razed to the ground  
Bump out houses empty shells  
Here on earth it's just a mortal hell

How they died no-one will ever know

They said they would save us as deterrents they would be used  
Except they brought destruction to an earth that grows no food  
Now we are gone for ever no tombs can hold your names

How they died no-one will ever know
