

## Just a Dream

Exxplorer

Woke up this morning  
Get off your lazy ass  
It is your last warning  
And you're not going to last

I try to drag, you kick and fight  
I'm trying all  
I stay in limbo almost every night  
I can't believe the spell you've undergone  
We install a pledge of gentle sleep  
When it's over you can say  
I'm glad it's happened that way

It's just a dream  
It's just a dream  
Just a dream

I can't believe the words you say  
I can't even listen to your breath  
I'm going to fight, for it's OK  
The many time I dream of day

It's just a dream  
It's just a dream

I feel the crowd inside of me  
The end is near, I do believe  
What is this madman I've become  
I can't believe what my eyes see  
As I dream, as I dream  
Slowly bleeding, it's just a dream
