

## Escape

### Eyes Set to Kill

Grind your teeth, bite your tongue till it bleeds  
From beneath, they've come out to feed  
Only we can mold our own destiny  
Believe in me for I'm the light and now I must lead  
They'll come scraping like violent wind and we will take cover  
We'll be ready on our own, it's been so long, will we ever see  
the Sun?  
We've been alone, counting the days will they breach our hide a  
way  
Surrounded by darkness we made it all this way  
We'll fight off the darkness and plan for our escape

Sincerely, I knew you could depend on me to get us out of here  
alive  
If only we had more time to plan but now we flee, believe in me  
They'll come scraping like violent wind  
How long til it's over?  
We'll be ready on our own

It's been so long, will we ever see the sun?  
We've been alone, counting the days will they breach our hide a  
way  
Surrounded by darkness we made it all this way  
We'll fight off the darkness and plan for our escape

They'll come scraping like violent wind and we will take cover  
We'll be ready  
They'll come scraping like violent wind and we will take cover  
We'll be ready  
They'll come scraping like violent wind and we will take cover  
We'll be ready on our own

It's been so long, will we ever see the sun?  
We've been alone, counting the days will they breach our hide a  
way  
Surrounded by darkness we made it all this way  
We'll fight off the darkness and plan for our escape

Darkness is an illusion  
Just don't fall for it  
Come with me and take my hand, take my hand
