Grind your teeth, bite your tongue till it bleeds From beneath, they've come out to feed

Only we can mold our own destiny

Believe in me for I'm the light and now I must lead

They'll come scraping like violent wind and we will take cover We'll be ready on our own, it's been so long, will we ever see the Sun?

We've been alone, counting the days will they breach our hide a way

Surrounded by darkness we made it all this way We'll fight off the darkness and plan for our escape

Sincerely, I knew you could depend on me to get us out of here alive

If only we had more time to plan but now we flee, believe in me They'll come scraping like violent wind How long til it's over?

We'll be ready on our own

It's been so long, will we ever see the sun?

We've been alone, counting the days will they breach our hide a way

Surrounded by darkness we made it all this way We'll fight off the darkness and plan for our escape

They'll come scraping like violent wind and we will take cover We'll be ready

They'll come scraping like violent wind and we will take cover We'll be ready

They'll come scraping like violent wind and we will take cover We'll be ready on our own

It's been so long, will we ever see the sun?

We've been alone, counting the days will they breach our hide a way

Surrounded by darkness we made it all this way We'll fight off the darkness and plan for our escape

Darkness is an illusion

Just don't fall for it

Come with me and take my hand, take my hand
