

## Killing in Your Name

### Eyes Set to Kill

You call it conviction  
I can see right through your game  
With no hesitation  
You take our rights and yet  
We're still killing in your name

The lies are not forgotten!  
Can you hear our voices calling?

Everything you say to me has led me to believe  
The truth will only get farther, farther away  
Everything is like a dream, there's no reality  
The truth will only get farther, farther away  
We're still killing in your name

You call yourself special  
No one will do what you say  
We want you to suffer  
You take our rights and yet  
we're still killing in your name

The lies are not forgotten!  
Can you hear our voices calling?

Everything you say to me has led me to believe  
The truth will only get farther, farther away  
Everything is like a dream, there's no reality  
The truth will only get farther, farther away  
We're still killing in your name

Everything you say to me has led me to believe  
The truth will only get farther, farther away  
Everything is like a dream, there's no reality  
The truth will only get farther, farther away  
We're still killing in your,  
Still killing in your name
