

The New Plague

Eyes Set to Kill

The sound starts creeping in
You start sweat your knees give in
You're not alone
You jump high when I say go!

GO!

Brace yourself and let the beat flow
The best has yet to come let the bullshit go
Let's march along to the beat of our hearts
From the top of your lungs sing out the part!

The wind is blowing all of our fears away
Our voices bring new meaning

Let the infection spread
I wanna see you bang your head
Until there's nothing left
Let the infection spread
From top to bottom let it spread
We're the new plague
Tonight we rock until we're dead

I wanna see you jump!
Turn up the tune one knotch
I didn't say to stop
Scream,
scream until you drop!

The wind is blowing all of our fears away
Our voices bring new meaning

Let the infection spread
I wanna see you bang your head
Until there's nothing left
Now the infection spreads
we scream it out we're the new plague
Tonight, tonight,
tonight we rock until we're dead

Dead!
Dead!

We only have one shot
We'll put it on the line
For this is our time.
This is our time
We'll leave it all to bare
Don't be afraid and dare
Cuz if you don't risk a thing
What's the point of living

You are not alone
You jump high when I say go!
