

You and I Tonight

Faber Drive

Tonight a candle lights the room,
Tonight it's only me and you,
Your skin like gravity
Is pulling every part of me,
I fall, you and I collide

What if I stay forever?
What if there's no goodbye?
Frozen for a moment here in time,
Yeah,
If you tell me the sky is falling,
Or say that the stars collide,
The only thing that matters in my life,
Is you and I tonight

Our eyes close the candle burns away,
But I know the fire still remains
This love is all we need
We fit together perfectly,
I fall, you and I collide

What if I stay forever?
What if there's no goodbye?
Frozen for a moment here in time,
Yeah,
If you tell me the sky is falling,
Or say that the stars collide,
The only thing that matters in my life,
Is you and I tonight

I wanna see this through
I'm gonna give it all to you

Tonight a candle lights the room
Tonight, it's only me and you, oh

What if I stay forever?
What if there's no goodbye?
Frozen for a moment here in time,
Yeah,
If you tell me the sky is falling,
Or say that the stars collide,
The only thing that matters in my life,
Is you and I tonight

Tell me you'll stay forever
Just you and I tonight
Tell me you'll stay forever
Just you and I tonight.
