

## Across State Lines

Face to Face

There's fear in everyone  
You can manipulate it  
Just pull the string and watch the show

Bright lights as we go by  
They fade into darkness  
Winding down this unknown road

You wouldn't be caught dead  
In something less than stylish  
And you won't be going home again

We're going to run it all night  
Running across state lines  
And I don't want this to end  
We're going to run it all night

A chance for everyone  
They really still believe it  
Just bait your hook and tug the line

The night sky hangs above  
And under a veil of secrets  
There's a greater truth we can't deny

You wouldn't be caught dead  
In something less than stylish  
And you won't be going home again

We're going to run it all night  
Running across state lines  
And I don't want this to end  
We're going to run it all night
