

Bright Lights Go Down

Face to Face

Bright lights go down
Bright lights go down
They say there'll come a day
When you better be ready for the breakdown
Until the bright lights go down

"If you don't stand for something, you'll fall for
anything
I remember when I said this
And I was full of it
I made it up
Because it's what they say
I've had enough of people anyway
So let's get out and burn this day down to the ground

Until the bright lights go down
Bright lights go down
They say there'll come a day
When you better be ready for the breakdown
Until the bright lights go down

No atheists in a foxhole?
You never had nothing to lose
Are you just when when it's convenient?
Climb aboard this ship of fools

There's nothing left for you and I to say
You've done your best
It's gonna be OK
Forget the rest of what you want to say and stay gold

Until the bright lights go down
Bright lights go down
They say there'll come a day
When you better be ready for the breakdown
Until the bright lights go down
