

What You Came For

Face to Face

And I don't know what you came for
Still around
And I don't know what you came for
Still around

And please don't leave
And please don't leave
And please don't leave

It's not what I've been looking for
But you showed me there's something more
I could ever see inside myself
Let me hear I fell apart
Despite of you and in spite of myself

And I don't know what you came for
Still around
And I don't know what you came for
Still around

And please don't leave
And please don't leave
And please don't leave

Cause it's not what I've been looking for
But you showed me there's something more
I could ever see inside myself
When you let me hear I fell apart
Despite of you and in spite of myself

And please don't leave
Now please don't leave
And please don't leave

Cause you know what I've been looking for
But you showed me there's something more
I could ever see inside myself
When you let me hear I fell apart
Despite of you and in spite of myself
