

Who You Are

Face to Face

Well maybe I don't look like you think I should
And maybe we do nothing alike
Another day and I just don't think that it ever will
Nothings changed through all this time

Nothings changed and I just can't see how this anger still exists
But song calms me down, lets put an end to lies and the prejudice

There's nothing wrong with who you are
Because your not like me
I'm sick and tired of ignorance
And all this bigotry
Its not to say that we feel blame
Its not to late to realize we're all the same

Stop telling me about your minorities
Stop telling me about superiority
Nothings changed and just can't see how this anger still exists
But time calms me down, lets put an end to lies and the prejudice

There's nothing wrong with who you are
Because your not like me I'm sick and tired of ignorance
And all this bigotry
Its hard to say that we feel blame
Its not too late to realize we're all the same
We're all the same, we're all the same
Yes we are

Well maybe I don't look like you think I should
And maybe we do nothing alike
Well I'm sorry
