

# Keep the Faith

Fade

Dazed and confused  
Black and blue he sits alone now  
Craving one more pill to numb his ache  
On the way to run from all the anger  
Choking on the tear gas

Gunfire tearing up the night  
This is not even his fight  
Is this the cost of stolen freedom?  
Is it worth the sacrifice?  
The legless corpses line in the street  
As children cry themselves to sleep  
One more night love's in the grave

Dysfunction  
Temptation  
To leave the violence behind  
The damage done has left a scar so deep

Keep the faith when darkness comes  
I give myself to make you still  
The nights will bleed  
The days will burn  
I'll stay till you return  
So keep the faith  
'Cause it's meant for you

16, so sweet, when she gave herself the first time  
Promises of love turned out to be lies  
Thrown to the street  
The pregnant girl that no one stuck around for

Bring in a new life to exile  
Or cut the chord while there's still time  
Not even God will give the answers  
To abomination's bride  
Dreams die under the knife of loss  
Feels like she's up there on the cross  
Is our nature such a sin?

Rejection  
Confusion  
She's gonna sleep and not wake up  
The damage done crushed her glass heart to pieces

Keep the faith when darkness comes  
I give myself to make you still  
The nights will bleed  
The days will burn  
I'll stay till you return  
So keep the faith  
Believe in this  
Just keep the faith  
'Cause it's meant for you

Keep the faith when darkness comes  
I give myself to bring you peace

The nights will bleed  
The days will burn  
I'll stay until you return  
So keep the faith  
Believe in this  
Just keep the faith  
'Cause it's meant for you
