

Million to One

Fade

Wanna go beyond the stars?
Wanna be the next one born?
So many in this world telling us lay down and just conform
There is a fear of the unknown
It's wide awake in everyone
But the land of dreams will be
Where the heart breaks through all boundaries

Critics all live to talk
Haters love to deter
But where would we be now
Locked up inside their words?
Facing the greatest odds we see what lives within
Million to one

So take my hand
Over every obstacle that comes our way
Into the infinite
And take my word
This is inside of us all
Reach out and take my hand today

Even if it hurts sometimes
Gotta fall before you fly
Greatness will never be an achievement that comes with no tears
So give it everything you've got
Fight against the rising tide
When you feel like you could drop
Gotta seek to strive and never stop

Skeptics say there's no way
Something you've heard before?
But if you listened then
Let's make them eat their words
Facing the greatest odds we touch what lives within
Million to one

So take my hand
Over every obstacle that comes our way
Into the infinite
And take my word
This is inside of us all
Reach out and take my hand today

So take my hand
Over every obstacle that comes our way
Into the infinite
And take my word
This is inside of us all
Reach out and take my hand today

'Cause I'll be there
If you want to see the view from outer space
We are the infinite
Just take my word
That this is alive inside of us
Reach out and take my hand today
