

Pain Inside

Fade

Breathe out
And breathe in
Accept what is
In front of me now
Doesn't matter
How I may feel cause deep inside it shows
Looking back on what I've done till now
Tell myself that it's right
Been ignoring this voice in myself
For too long

With this pain inside
I can carry on
Till the day when I can look back at
What's been saving me
And slowly eating me alive

Through out all these years
While I've held my peace
You have taken everything from me
Let the serenade of solitude play

I want to
Feel nothing
So make me numb
From what's facing us now
The darkness
Amplifies every gap between the two of us

Take a look around
Cause there's nothing here
This is how I feel
Been ignoring this voice in myself
For too long

With this pain inside
I can carry on
Till the day when I can look back at
What's been saving me
And slowly eating me alive

Through out all these years
While I've held my peace
You have taken everything from me
Let the serenade of solitude play

With this pain inside
I can carry on
Till the day when I can look back at
What's been saving me
And slowly eating me alive

And this pain inside
Can make me realize
How I must move on
From this point now
So let the serenade of solitude play
