

# Pain Inside

Fade

Breathe out  
And breathe in  
Accept what is  
In front of me now  
Doesn't matter  
How I may feel cause deep inside it shows  
Looking back on what I've done till now  
Tell myself that it's right  
Been ignoring this voice in myself  
For too long

With this pain inside  
I can carry on  
Till the day when I can look back at  
What's been saving me  
And slowly eating me alive

Through out all these years  
While I've held my peace  
You have taken everything from me  
Let the serenade of solitude play

I want to  
Feel nothing  
So make me numb  
From what's facing us now  
The darkness  
Amplifies every gap between the two of us

Take a look around  
Cause there's nothing here  
This is how I feel  
Been ignoring this voice in myself  
For too long

With this pain inside  
I can carry on  
Till the day when I can look back at  
What's been saving me  
And slowly eating me alive

Through out all these years  
While I've held my peace  
You have taken everything from me  
Let the serenade of solitude play

With this pain inside  
I can carry on  
Till the day when I can look back at  
What's been saving me  
And slowly eating me alive

And this pain inside  
Can make me realize  
How I must move on  
From this point now  
So let the serenade of solitude play
