

# Come On

Fair Warning

"Come On"

The days of life flow by -  
Before my eyes  
I lost my patience to the night  
The streams I used to climb -  
They're running dry  
And now I'm tired of wasting time

'Cause out there in the deep blue sky -  
My stars are shining bright  
I look into those eyes of doubt -  
It's to say 'goodbye'

Come on and give your soul -  
The heartbeat of the thunder  
Take all these false controls  
And throw 'em all away  
Just look right through this life -  
Beyond the gates of reason  
Come on and let those children play

A drifter on the wind -  
That's what I am  
And now the distance calls my name

We go down the road of love -  
We'll meet again  
And we'll find nothing stayed the same

'Cause out there in the golden dawn  
We're rising with the wind  
I'll look into those eyes of love -  
It's only the begin

Come on and give your soul -  
The heartbeat of the thunder  
Take all these false controls  
And throw 'em all away  
Just look right through this life -  
Beyond the gates of reason  
Come on and let those children play -  
Let them play -

Come on and give your soul -  
The heartbeat of the thunder  
Take all those false controls  
And throw 'em all away  
Just look right through this life -  
Beyond the gates of reason  
Come on and let those children  
Come on and let those children play -  
Let them play -  
Let those children play

Let them play -  
Let those children play
