Baby Lay

Faith Evans

Baby baby Baby won't you lay your body down If you put it in my hands you know I'll work it out You can put your mind at ease no need to doubt Don't you know a lover and a friend in me you found

So let me take your cares away Just let me ease your pain Let me take your cares away Just let me ease your pain Baby now is the time that you make up your mind You can stop complaining Why you still explaining What you really waiting for

Baby won't you lay your body down If you put it in my hands you know I'm gonna work it out I can take your cares away if you just let me ease the pain Baby you know I can take all your cares away Just let me ease your pain Baby now is the time that you make up your mind You can stop complaining Why you still explaining What you really waiting for Baby tell me why (tell me why it is, what you waiting for) So tell me why you explaining What you really waiting for So tell me why you explaining What you really waiting for Tell me why you explaining What you really waiting for And you know I'll work it out Why you explain What you waiting for Tell me why, tell me why, baby tell me Can you tell me why Just tell me why Oh tell me why baby
