

# Change

Faith Evans

Change change change change  
Let's get it together  
Change change change change  
We got to make it better  
Change change change change  
Let's get it together

We the people have the right  
To set about a change in life  
Everyone has a destiny  
If I can take it upon myself  
To plant a seed and give some help  
There is better way to achieve

I want to stand up and tell the world  
I just want to shout it up  
I know we can change  
'Cause things don't always stay the same

If we take the time to look inside  
Show our children through our eyes  
What it means to be united (in the night) we stand  
Don't keep looking back on a lost  
Move ahead and don't fall short  
As one we can create our promised land

Don't feed another blame  
Lay your path away  
Step on when you're feeling safe  
I want to change

Don't waste your time away  
We are one and the same  
Step on when you're feeling safe  
I want to change

I want to stand up and tell the world  
I just want to shout it up  
I know we can change  
'Cause things don't always stay the same

Don't you wanna change?  
Everybody can change  
I know that we can change  
I know that we can make a change  
And if we find the way  
I know that we can change

I want to stand up and tell the world  
I just want to shout it up  
I know we can change  
'Cause things don't always stay the same

I want to stand up and tell the world  
Just want to shout it up  
I know we can change  
'Cause things don't always stay the same

We got to change  
We need to change  
Come on change  
Why don't you change?  
I want to change  
Things don't always stay the same  
We can make it together  
Things don't always stay the same
