

# Where We Stand

Faith Evans

Is it too soon to love you  
Why do I believe it's perfect  
Could it be I'm scared to take a chance  
Think that we are moving too fast  
And I don't know where we stand (I don't know where we stand)

Today you said some things to me  
That made it plain for me to see  
And now I do believe  
That there's a chance for you and me  
Elated I would be  
If it became reality  
I'll put away my fears  
Cause only fate has brought us here

Is it too soon to love you  
When i just meet you the other day  
Why do believe it's perfect  
Enspired by all the things you say  
Could it be I'm scared to take a chance  
Think that we are moving fast  
And I don't know where we stand (I don't know where we stand)

It's just a few days but I'm open wide  
Or maybe I should take my time  
I'm thinking that we're moving fast but I want you bad  
My mind is telling me one thing  
But my body says another  
I wanna be your lover

Is it too soon to love you  
When I just met you the other day  
Why do I believe it's perfect  
Enspired by all the things you say  
Could it be I'm scared to take a chance  
Thinkin' we are moving fast  
And I don't know where we stand (I don't know where we stand)

It's hard to figure out  
In the back of my mind there's so much doubt  
Why do I look for clues  
When there's no reason to question you  
It's only natural  
I Just gotta wait and see  
Will we ever prosper  
Will we ever prosper

Tell me is it to soon to love you  
When i just met you the other day  
Could it be that I'm scared to take a chance  
Deep inside I don't know where we stand

Is it too soon to love you  
When I just met you the other day  
Why do I believe it's perfect  
Enspired by all the things you say  
Could it be I'm scared to take a chance

Think that we are moving fast  
And I don't know where we stand (I don't know where we stand)  
Is it too soon to love you  
Why do I believe it's perfect  
Could it be I'm scared to take a chance  
And I don't know where we stand (I don't know where we stand)
