

# Fuck You and All Your Friends

Falling in Reverse

This will be the last song I'll ever sang  
About a person that I'd rather not name  
You think you're so goddamn cool  
Everybody thinks you're a fucking fool  
Crash and burn on a car ride home  
It would be a lot better if I slit your throat

And die for me, die for me  
Why don't you?  
I will sing this song  
And know they're better off without you

I'm done with you for good  
We were always like a time bomb ticking  
And you're so Hollywood  
You're always searching for the next best thing  
And it's for the better  
So I guess best friends don't last forever

I taught you all about breaking hearts  
I didn't know that you would take it that far  
I never thought after all these years  
I would be the one that make you disappear

And die for me, die for me  
Why don't you?  
I will sing this song  
And know they're better off without you

I'm done with you for good  
We were always like a time bomb ticking  
And you're so Hollywood  
You're always searching for the next best thing  
And it's for the better  
So I guess best friends don't last forever

Fuck you and all your friends  
Fuck you and all your friends  
Fuck you and all your friends  
Fuck you and all your friends

Fuck you and all your friends  
Fuck you and all your friends  
Fuck you and all your friends  
Fuck you and all your friends

I'm done with you for good  
We were always like a time bomb ticking  
And you're so Hollywood  
You're always searching for the next best thing  
And it's for the better  
So I guess best friends don't last forever

I'm done with you for good  
We were always like a time bomb ticking  
And you're so Hollywood  
You're always searching for the next best thing

And it's for the better  
So I guess best friends don't last forever
