

You can see I am in shock  
To catch you wearing wires underneath your heart  
It was mechanical  
But we were born to endless architecture  
Spinning to a fault and infinitely strewn  
Where you'd be ahead of your time

Cause in this place it's beautiful

Tracing lines your flaws connect the starry skies  
He is tracing lines like flashes right before your eyes  
Grace comes like a thief in the night  
It comes like a thief in the night  
It blooms in the weak and the blind

Then they finished their machine  
It's algorithmic parts perfectly in time  
And that's how they found you  
But listen you are born into a landscape  
That's glittering like water and covered by a blood  
It has been bruised at the heel, the wire's been cut

You can feel it

Tracing lines your flaws connect the starry skies  
He is tracing lines like flashes right before your eyes  
Tracing lines your flaws connect the starry skies  
It comes like a thief in the night

Tracing lines your flaws connect the starry skies  
He is tracing lines like flashes right before your eyes  
Grace comes like a thief in the night  
It comes like a thief in the night  
It blooms in the weak and the blind
