Sad situation just makes us strong  
It's true that we all belong  
To the world that's all around us

Hate wars behind the door  
And everybody plays this game for the score  
It's the same again, we all complain  
Cause all we want is money and fame  
We built the hedge and we built the fence  
Those walls of lies we call "defense"  
We must listen to bullshits that's got no sense  
It's all about fighting and violence

We say we won't do it but we do it again  
We try to prove it yeah we try but it's the same everyday  
Hard run for your life again and again  
No faith in this game no gate to escape  
We say we won't do it but we do it again  
We try to prove it yeah we try but it's the same everyday  
Hard run for your life again and again  
No faith in this game no gate to escape

We've gotta stop, hold on, slow down  
We've gotta change those things around  
Need to join all men in every town  
Sing and jump as Massais, jump around

Jump jump jump around  
Jump jump jump around  
Wohowohowohoa  
Wohowohowohoa  
Jump jump jump around  
Jump jump jump around  
Wohowohowohoa

We see them fight, we hear them lie  
Them a dweet over again and one more time  
All real badmen them try for hide  
Just another victim, another crime  
Better you go on for rise your hands and voice  
Millions people die, them have no choice  
We still believe but peace is miles away  
Let's start change those stupid things today

All people are equal, we have to fight for unity  
One love, one body, all colors and diversity  
The fight for amity and fight for humanity  
Help each other, and built a new society  
Let's break it and hit it, all these crimes committed  
By the hand of the leaders, cause their hands are dirty  
That ain't not funny and ain't not right  
All we've got to do is rise and fight  
Get up, stand up and nothing's gonna stop you  
Just be yourself cause it's just all about you  
We've gotta go and we'll break the wall  
United we stand - divided we fall

We call it the right society  
We call it the world of dignity  
Land of opportunities  
Why if we can't be free?
