Fastball

Try to stop the world spinning 'round
My phone bill will tell you she lives out of town
It's been a long, long time but still I dream
Of warm sunny days on 12th and Lorraine
I wish you were here right now....but then

I know I should just leave you alone
I should just leave you alone
I know I should just leave you alone
I should just leave you along

The ground moved under me
I pushed her away with the things I'd say
God's face grew
Earthquake size
And I can't cross our great divide
I wanna live inside....but then

I know I should just leave you alone
I should just leave you alone
