Fastball

Try to stop the world spinning 'round  
My phone bill will tell you she lives out of town  
It's been a long, long time but still I dream  
Of warm sunny days on 12th and Lorraine  
I wish you were here right now....but then

I know I should just leave you alone  
I should just leave you alone  
I know I should just leave you alone  
I should just leave you along

The ground moved under me  
I pushed her away with the things I'd say  
God's face grew  
Earthquake size  
And I can't cross our great divide  
I wanna live inside....but then

I know I should just leave you alone  
I should just leave you alone
