

Someday

Fastball

Took a ride up to Reno
Diamond star halo, lookin' around
Pushin' blues at the station
I feed the frustration that's kickin' around

But you don't even know what day it is
And you don't even know my name yet

Baby, take a look at yourself
Heaven sees what nobody else can see
You'll be free someday

Yeah, it's alright, it's just
A matter of time 'til I find my feet
You've got your education
Know how to work you're persuasion
You ain't foolin' me

'Cause you don't even know what day it is
And you don't even know my name yet

Baby, take a look at yourself
Heaven sees what nobody else can see
You'll be free someday

You don't even know what day it is
You don't even know my name yet

Baby, take a look at yourself
Heaven sees what nobody else can see
You'll be free
