Recognize my presence this rap game specialized with legends I drop shit niggaz try to memorize in seconds
You criticize me still visualize the lessons
And when i wish to put aside the questions
Before they find out, who's the realest
Who done spoke without one joke about the illest
Shit that ever happened, in this rappin beyond rappin
Joe the god it ain't so hard to start clappin
But i lay low, create flows, for the pesos
Now we got extra hoes, wantin to chase shows
I take foes, and break em down to minerals
We went from street corner thugs to white collar criminals
Individuals, with no peace on the quest
The iced out, piece on my chest, from the east to the west

Never sleep in a sweat, keep the heat with the vest
Ready for the 'casian blazin gettin deep with the best
The police wanna test my strategy, got half of the world
Mad at me, but very few challenge me
Perhaps you will be the first to approach this, lyrical dope shit
Cartagena will bring the chrome like explosives
Now what you love huh? dat gangsta shit
What you want huh? dat gangsta shit
Now what we live huh? dat gangsta shit
Dat gangsta shit, dat gangsta shit
Yeah, uhh, uhh
