Swansong

We're watching you falling Lower and lower Crying at your grave we'd rather be The witness all the debasement You make us see Step off the stage and let us keep The memory of what was great and deep

Cluching at your own past Won't build a bridge into tommorow Everything's gone and I'm the last Who leaves with embrrassment and sorrow Lust of the past Fresh blood came too fast Step off the stage This is our rage Our era you won't last long We're waiting your swansong

Don't wanna watch your pathetic fight To remain on teh top in the spotlight Glitter and glory of your past Die slain by shadows that you cast Death ang glory Live by the rule Once a star now a fool No one is sorry For a losser who omits to see That nothing is how it used to be Faust
