## **Final Exit**

## **Fear Factory**

Your Life no longer has any value Let them tell you what your own life is worth There is no compassion as life fades away This self deliverance the choice you have made

Contemplate your last breath As you see the face of death Contemplate your last breath Breath, slowly breath

The pain in your life I cannot perceive Crimes of humanity I see and believe Contemplate your last breath As you see the face of death Contemplate your last breath Breath, slowly breath Goodbye

Like the knife that cuts through me Stabbing uncertainty It bleeds my life I know Draining my heart my soul...

Contemplate your last breath As you see the face of death Contemplate your last breath Breath, slowly breath Goodbye Goodbye
