I know you like it You like it like that You like it

I hope you like it There's no holding back You like it

I know you like it You like it like that You like it

I hope you like it There's no holding back You like it

I know you like it You like it like that You like it

I hope you like it There's no holding back You like it

I know you like it You like it like that You like it

I know you like it You like it like that You like it

Is it the right way
Is it the right way home?
Lost inside this desert silence

Is it the right way
Wait 'til the morning comes
Is it the right,
Is it the right,
The right way

I kept on driving Tryin' to get back Kept driving

Just keep on driving Facing the blast Keep driving

I kept on driving Tryin' to get back Kept driving

Just keep on driving Facing the blast Keep driving I kept on driving Tryin' to get back Kept driving

Just keep on driving Facing the blast Keep driving

Is it the right way
Is it the right way home?
Lost inside this desert silence

Is it the right way
Wait 'til the morning comes
Is it the right,
Is it the right,
The right way

I know you like it You like it like that You like it

I hope you like it There's no holding back You like it

I know you like it You like it like that You like it

I hope you like it There's no holding back You like it

I know you like it You like it like that You like it

I hope you like it There's no holding back You like it

I know you like it You like it like that You like it

I know you like it You like it like that You like it

Is it the right way
Is it the right way home?
Lost inside this desert silence

Is it the right way
Wait 'til the morning comes
