

## Oxygen

Feeder

We all ferment, a face can change  
But souls stay young  
We're all connected so take a journey  
With someone learn to be as one

Still living, sinking, falling, twisting  
But I'm breathing you in  
Breathing you in oxygen, oxygen

We all ferment, a taste can change  
From days so young  
You feel rejected, just hold your head up  
To the sun learn to be as one

Still living, sinking, falling, we're still living, drifting  
I'm breathing you in, breathing you in  
Still living, sinking, feeding, twisting, I'm living  
I'm breathing you in, breathing you in  
Disconnecting oxygen, oxygen, oxygen

Still living, sinking, falling, twisting, still living  
I'm breathing you in, breathing you in  
Still living, sinking, falling, drifting, we're living  
I'm breathing you in, breathing new air
