

Quick Fade

Feeder

Time, time on your mind
A conscience ticking
Images passin' by like picture slides arranged

Love will survive
It twists and turns you
A circuit inside your head reminds you that it's fine

I miss you more than words can say
A part of me has torn away
A China heart will always break
(He's gone)
A fracture to a twisted face
(Gone, quick fade)
But things are gonna heal again
Eyes once blind will see again
I miss you more than words can say
(He's gone)
I miss you more than words quick fade
(Gone, quick fade)

Try, learnin' to fly
Reach the new sky
Find a new place to be and watch life pass you by
Try to get high
Jumped so you could feel it
You're livin' inside a dream as waterfalls surround

I miss you more than words can say
A part of me has torn away
A China heart will always break
(He's gone)
A fracture to a twisted face
(Gone, quick fade)
But things are gonna heal again
Eyes once blind will see again
I miss you more than words can say
(He's gone)
I miss you more than words quick fade
(Gone, quick fade)

Fade, Fade, Fade

Glide, glide over tides
And waves that pull you
Oceans divide us once
And bring you home again
Love will survive
It twists and turns you

He's gone, gone, quick fade
It's gone, gone, quick fade

I miss you more than words can say
A part of me is torn away
A China heart will always break
(He's gone)

A fracture to a twisted face
(Gone, quick fade)
But things are gonna heal again
I miss you more than words can say
(He's gone)
I miss you more than words quick fade
(Gone, quick fade)
